Zoho Round 1 — Day-by-Day Roadmap

28-day plan for the Written Test (Aptitude + Programming). ~2–3 focused hours/day.

WEEK 1 · Days 1–7 — Aptitude Foundations

Day	Focus Area	Tasks
Day 1	Number Systems	• LCM/HCF, divisibility rules, remainders • 20 timed practice questions, no calculator
Day 2	Percentages & Ratios	• Percentage change, ratio & proportion, mixtures • 20 timed questions
Day 3	Averages & Profit/Loss	• Averages, weighted averages, profit/loss, discount • 20 timed questions
Day 4	Time & Work	• Work efficiency, pipes & cisterns, combined work • 15 questions + 5 puzzle-style word problems
Day 5	Time, Speed & Distance	• Relative speed, trains, boats & streams • 15 questions, review formulas sheet
Day 6	Simple/Compound Interest + Mixed Review	• SI/CI problems • Take a 45-min mini aptitude test covering Days 1–5 topics
Day 7	Rest / Light Revision	• Redo all Day 1–6 mistakes • Make a one-page formula cheat sheet

WEEK 2 · Days 8–14 — Logical Reasoning & Puzzles

Day	Focus Area	Tasks
Day 8	Number & Letter Series	• Pattern recognition drills • 20 series questions, aim under 1 min each
Day 9	Coding-Decoding & Blood Relations	• Practice standard coding schemes • 15 blood relation puzzles
Day 10	Direction Sense & Syllogisms	• Direction + distance problems • Venn-diagram based syllogism practice
Day 11	Seating Arrangements	• Linear and circular arrangement puzzles • 5 full puzzles with sub-questions, timed
Day 12	Logical Deduction Puzzles	• Statement-conclusion, logical grouping puzzles • 15 questions
Day 13	Previous Years' Zoho Aptitude Papers	• Solve one real Section-1 style paper end to end, timed
Day 14	Full Aptitude Mock + Review	• 90-min full aptitude mock (Section 1 conditions) • Review every mistake, log recurring error types

WEEK 3 · Days 15–21 — C Programming Core

Day	Focus Area	Tasks
Day 15	C Basics Refresher	• Data types, operators, operator precedence • Trace 10 short snippets by hand
Day 16	Loops	• for / while / do-while tracing, nested loops • 10 output-prediction questions on paper
Day 17	Arrays & Strings	• Array traversal, string functions, common gotchas • 10 output-prediction questions
Day 18	Pointers	• Pointer arithmetic, pointer-to-pointer, arrays vs pointers • 10 tricky pointer output questions
Day 19	Functions & Recursion	• Call stack tracing, recursion with return values • 10 recursion trace questions
Day 20	Structures & Switch-Case	• Structures, nested structures, switch-case fallthrough • 10 mixed output questions
Day 21	Full Programming Mock + Review	• 60-min mock: 10 output-prediction questions, timed • Review every wrong trace line-by-line

WEEK 4 · Days 22–28 — Mock Tests & Final Polish

Day	Focus Area	Tasks
Day 22	Full Mock Test 1	• Complete Section 1 + Section 2 under real time limits • Score and log weak areas
Day 23	Targeted Fixes	• Redo only the topics you got wrong on Day 22 • 20 focused practice questions
Day 24	Full Mock Test 2	• Another complete timed mock • Compare speed/accuracy vs Mock 1
Day 25	C Output-Prediction Deep Dive	• Revisit trickiest pointer/recursion traps • 15 hard output questions
Day 26	Aptitude Speed Drill	• Rapid-fire: 30 mixed aptitude questions in 30 minutes
Day 27	Full Mock Test 3 (Final Dress Rehearsal)	• Simulate exact exam conditions: pen, paper, no calculator • Full review afterward
Day 28	Light Revision & Rest	• Skim formula sheet and common C traps only • No new topics — rest well before the test

Tips: Keep each day to a fixed 2–3 hour block. Always time yourself — Zoho's Round 1 rewards speed and accuracy, not just correctness. There's no negative marking, so never skip a question in mocks either. If your test date is closer than 28 days, compress proportionally (e.g. 14 days = do 2 days' worth per day).
